Surfaces should be free of excess waste or fecal matter. Pre-cleaning may be necessary. Prepare disinfectant solution by adding the required number of tablets to a solution of water. Apply to pre-cleaned surface with mop, cloth, sponge, brush, wipe, foaming equipment, or coarse trigger sprayer. Allow surface to remain wet for up to 4 minutes. Let air dry. Prepare a fresh solution weekly when using closed containers (spray bottles). Prepare a fresh solution daily when using open containers (buckets) or if solution becomes diluted. All treated equipment that will contact food or be used for feeding or drinking water must be rinsed with potable water before reuse.
