## LAUNDRY SOUR

Pyxis™ Sour is a powerful acidic solution that lowers the pH of commercial linens while neutralizing iron residual in the water preventing yellow stains. The appearance of the finished linens are greatly affected by the condition of the water used in the wash process. This unique formula eliminates hard water deposits preventing greyness and making whites brighter.

Pyxis Sour is concentrated allowing a low cost per load and the ability to significantly lower the pH of the linens in large washers without the need of a large capacity pump. Small doses will lower the pH of linens to be compatible for human skin contact. A little more product will lower the pH to be compatible with ironers (to prevent binding).

#### TECHNICAL DATA

**APPEARANCE:** clear light green liquid

**ODOR:** acidic

**WEIGHT:** 9.7 lbs/gal

**pH (concentrate):** ~1.0

**FREEZE/THAW:** stable

**PHOSPHATES PRESENT:** none
